Subject: free software to every school in America

Dear DOJ USA,

I am an American citizen currently living in Canada. I am outraged at this proposed settlement. All this is going to do is introduce Microsoft to a new market, one that will allow them to further extend their monopoly.

Red Hat Linux has offered to provide free software to every school in America if Microsoft provides the value of its donation in hardware costs rather than its own software. This is the perfect solution and will not allow microsoft to victimize us with their unstable, expensive, software that cant be customised. Well i hope you are aware of the advantages of using Linux in our nations schools. I am counting on you to make the right decision.
